Snap-Tite® Culvert Lining Adds New Distributor in West Virginia

Louisville, Ky. (May 11, 2010) – In order to provide enhanced solutions to customers in West Virginia, Louisville, Ky.-based ISCO Industries, recently announced the addition of a new distributor for its [Snap-Tite®](#) product line. The new distributor is Foster Supply, Inc., which has two locations in West Virginia.

This is an exclusive distributorship agreement between ISCO Industries and Foster Supply to service all customers in West Virginia. Foster Supply will now distribute both the Snap-Tite culvert lining high-density polyethylene (HDPE) pipe and Buttress-Loc® products. The distributor agreement went into effect on May 1.

“We chose Foster Supply as the new distributor of Snap-Tite because the company has built a reputation throughout West Virginia as a reliable source for piping, and other construction supplies,” said Ryan Harrington, Snap-Tite culvert lining sales manager. “They have representatives positioned around the state to provide customers with real-time solutions.”

“We have teamed up with Snap-Tite and Ryan Harrington to better serve our customers in the area,” said Joe Pingley, sales manager for Foster Supply, Inc. “Snap-Tite is *the solution* for culvert lining and rehabilitation, and is a great addition to our existing product line.”

The Snap-Tite HDPE culvert lining system is a no-dig pipe lining solution. Its patented machined male and female ends “snap” together to form a water tight seal. The patented Buttress-Loc® HDPE piping system uses a unique lock joint to easily convert short lengths of pipe into a continuous pipeline.

About Foster Supply, Inc.

Foster Supply has been in business since 1982, servicing the construction and mining industries. Foster Supply supplies and installs pipe, geotextiles, liner systems and concrete products. For more information about Foster Supply, go to www.fostersupply.com/foster.asp.

About ISCO

Since 1962, ISCO Industries, a customized piping solutions provider headquartered in Louisville, Ky., stocks and sells HDPE pipe and other materials to provide piping solutions for various mining, industrial, municipal, environmental, geothermal, golf, culvert-lining and landfill applications throughout the United States and Canada. The company also rents, services and sells McElroy fusion equipment. ISCO has more than 20 facilities in the United States, as well as in Canada and Australia – inventorying large stockpiles of pipe, usually within a one day delivery of most projects. For more information on ISCO, visit www.isco-pipe.com, and for more information about Snap-Tite, visit www.culvert-rehab.com.
